匯報原則 REPORTING PRINCIPLES

The Report is prepared in accordance with the “Environmental, Social and Governance Reporting Guide” set out in Appendix C2 to the Listing Rules of the Stock Exchange (the “[Guide](#)”). The contents covered herein are in compliance with the provision of “Comply or Explain” as well as four reporting principles of materiality, quantitateness, balance and consistency required in the Guide.

持份者參與及重要性 STAKEHOLDER ENGAGEMENT AND MATERIALITY

The Group values input and feedback from its stakeholders as they bring potential insights to the Group's business. The Group communicates with different stakeholders through regular engagement activities to better understand their concerns and expectations on the Group's ESG and business performance.

To effectively promote sustainable development and bring positive impact to the long-term development of the environment and community, the Group pledges to continuously communicate and exchange opinions with internal and external stakeholders (including, but not limited to, shareholders/investors, staff, customers, business partners, suppliers, regulatory authorities, and community/non-governmental organisations) to understand their views and expectations.

The input of various stakeholders shall be incorporated while determining and assessing ESG risks, and while formulating relevant risk management and business strategies. After gaining further insight on which ESG aspects are deemed important by stakeholders, a materiality assessment shall be produced to determine the most material ESG topics to the Group. The Board of Directors (the "董事會") believes that transparent communications with stakeholders shall play a crucial role in

持份者參與及重要性 STAKEHOLDER ENGAGEMENT AND MATERIALITY

The materiality assessment process is crucial to the decision-making process of the Group and its sustainability reporting. It helps identify and prioritise the issues that matter most to its stakeholders. The Board has worked with external consultants to establish a materiality assessment process and to identify material ESG risks to the Group. Upon extensive discussions and research, the Board has made the decision to adopt the Sustainability Accounting Standard Board (the “SASB”) Standard as the basis for its material assessment. Founded in 2011, the purpose of the SASB Standard was to establish and maintain industry-specific standards that assist companies in disclosing financially material, decision-useful sustainability information to investors.

In addition to the above, the Group has also incorporated the concept of double materiality into its materiality assessment process during the Reporting Period. Double materiality comprises of impact materiality, which considers actual and potential positive or negative impacts on people and the environment connected to the Group's operations, products, services, and value chain; as well as financial materiality, which considers sustainability-related risks and opportunities that could reasonably be expected to influence the Group's financial position, performance, cash flows, access to finance, or cost of capital over the short, medium, and long term. In line with the European Sustainability Reporting Standards (the “ESRS”), this assessment shall cover the Group's own

追求環境卓越 PURSUING ENVIRONMENTAL EXCELLENCE

While the refined tea industry which the Group operates in is not highly polluting, every effort has been made to reduce generation of waste and other emissions. For example, the Group has taken care to request for plantations from which it procures tea leaves to not overuse fertilisers within its plantations, as to avoid nutrient-rich runoff or effluent from disrupting the local ecosystem. The Group has implemented company-wide health, safety, social and environmental protection policies and standard operating procedures that include workplace management, process safety management, waste treatment and disposal, and emergency planning and response.

The Group did not note any cases of material non-compliance relating to air and greenhouse gas emissions, discharge into water and land, and the generation of hazardous and non-hazardous waste during the Reporting Period. Regarding any emissions and discharges which cannot be avoided, the Group has taken necessary measures to ensure compliance with all applicable national, industrial, and local standards, laws, regulations and policies. These include, but not limited to the following:

有害廢物

本集團的業務並無產生任何重大有害廢物，因此並未呈報相關數據。

The operations of the Group have not generated any significant amount of hazardous waste, thus related data has not been reported.

無害廢物

於報告期，本集團的業務營運產生約6噸無害廢物，密度為30.06公斤 噸產量。無害廢物類型包括茶葉雜質、粉末或碎茶葉、員工食堂的廚餘飯

During the Reporting Period, the Group's business operations generated approximately 6 tonnes of non-hazardous waste, density of 30.06 kg/tonne. Types of non-hazardous waste included tea impurities, powdered or broken tea leaves, food waste from staff canteen, and office waste from the Group's office operations. Tea impurities and broken or powdered tea leaves were sent back to plantations to be processed into fertilizers for self-use, whereas the other listed non-hazardous wastes were all recycled by licensed collectors.

See below for the detail breakdown of 2025 non-hazardous waste generation, as well as comparisons with Last Reporting Period.

A significant portion of the Group's GHG emissions come from purchased electricity and combustion of fuels at stationary sources and mobile sources. For the Group's measures on reducing energy consumption, further details shall be disclosed in the "Energy Use Efficiency Initiatives" section below.

The Group keeps track of employees' business travelling and their relative carbon emission throughout the year. The Group had adopted the use of video-conferencing software for sharing presentation materials among various parties, with the goal of encouraging its employees to limit the use of business air travel wherever possible.

To reduce emissions from paper waste disposal, the Group encourages double-sided printing for inner circulation documents, the Group has also begun transition towards a paperless office environment and digital data storage system. Furthermore, the Group may also purchase carbon certificates or plant more trees to sequester carbon dioxide, as to reduce its overall GHG emissions.

The Group had set the long-term target of reducing its Scope 1 and Scope 2 GHG emissions intensity by 10% in 10 years from 2022, or by 2032. See below for the detail breakdown of the Group's progress towards its emission reduction target.

In order to effectively respond to the changing post-epidemic market conditions, the Group has strategically prepared more processed products during the Reporting Period, which helps to reserve flexibility for its product launch strategy and allows the Group to make potential adjustments at any time based on market conditions. These processed products mainly include tea blends that need to be pressed and packaged before shipping, which are not included in total tea production. Additionally, production volume decreased during the Reporting Period primarily due to reduced market demand and lower revenue. As a result, the Group has prioritized clearing and absorbing existing inventory, proactively controlling the production pace, which has contributed to the reduction in output.

Based on these results, the Group shall be monitoring its progress on emissions reduction closely. Due to decreased production during the Reporting Period, the Group has recorded year-on-year increases in Scope 1 emissions and Scope 2 emissions intensity despite the reduction in combined Scope 1 and Scope 2 emissions. Nevertheless, the Group shall maintain its long-term emissions reduction targets. However, if the Group continues to stray from its emissions reduction targets in the future, the Group shall consider re-evaluating its targets, either through redefining the baseline year or adopting different units of intensity.

The Group encourages the reduced usage of paper, such as adopting e-fax, intranet platforms, and digital data storage systems to push paperless office environment in its business operations, using recycled paper, single-sided used paper, and double-sided printing for internal use and drafting documents, and recycling paper used when

During the Reporting Period, the Group's business operations consumed water amounted to 9,856.00 m³ (2024: 17,303.00 m³), contributing to the water consumption intensity of 49.73 m³/tonne of production volume. This corresponds to a 43.04% decrease and 88.87% increase from the Last Reporting Period respectively. This significant year-on-year increase in water consumption intensity is due to the decreased production volume during the Reporting Period in response to reduced market demand and lower revenue. As a result, the Group has prioritized clearing and absorbing existing inventory, proactively controlling the production pace, which has contributed to the reduction in output.

The Group is strongly dedicated to reducing its carbon footprint throughout its operations. It has made continuous efforts to identify energy use efficiency initiatives in its operations wherever possible.

The Group has identified that the highest relative energy consumption portion of operations as the tea leaf sorting process. To address this, the Group has implemented an automated system for this portion of the production process, which reduces energy wastage and elevates product quality.

Other high energy consumption portions of operations include the baking and drying process of tea refining, and so the Group has taken measures to reduce energy consumption through installing an automatic adjustment system which maintains the temperature and humidity optimally, while at the same time implementing stricter monitoring to prevent overloading, which lowers the energy efficiency of equipment. Furthermore, the Group has adopted policies to turn off idling machinery, which both prolongs the lifespan of tea processing machinery and reduces energy consumption.

- 於辦公室各主要通道及房間，以標示提醒員工於下班前關上照明及空調，藉此節約能源；及
- 於可行情況下，將本公司車輛更換為混合動力或電動車，減少消耗燃料導致的排放。

根據上述措施，本集團制定了以下減少能源消耗的目標：

- 自二零二二年起10年內(或到二零三二年)，將外購電力消耗密度降低10%；及
- 自二零二二年起10年內(或到二零三二年)，將固定燃燒源的燃料消耗密度降低10%。

In addition, the Group has plans for the following measures:

- Implementing energy saving measures, such as assigning staffs to inspect electrical appliance such as lights and production machinery. If equipment is found to be idling or left on outside of scheduled periods, the staffs shall follow up with responsible personnel;
- Replacing energy-intensive lighting such as high bay light and fluorescent lamps with high luminous efficacy light set such as LED lights when possible within the Group's operations sites;
- Reducing usage of air conditioning or other sustainable measures sustainable measures for better efficient use of energy within the Group's operations sites wherever possible;
- Reminding employees of energy-saving measures through labels for turning off lights and air conditioners before leaving work, which shall be provided in major corridors and rooms throughout the offices; and
- Replacing company vehicles with hybrid or electric vehicles when possible to reduce emissions from fuel consumption.

From the above-mentioned measures, the Group had set the following targets of energy consumption reduction:

- Reduce purchased electricity consumption intensity by 10% in 10 years from 2022, or by 2032; and
- Reduce fuel consumption intensity at stationary combustion sources by 10% in 10 years from 2022, or by 2032.

經計及所有上述因素，本集團將維持其長期節能目標。然而，倘本集團日後偏離其節能目標，本集團將考慮透過重新界定基準年或採用不同的密度單位來重新評估其削減目標。

Taking all of the above in account, the Group shall maintain its long-term energy reduction targets. However, if the Group strays from its energy consumption reduction target in the future, the Group shall consider re-evaluating its reduction target, either through redefining the baseline year or adopting different units of intensity.

水資源利用效率舉措

本集團鼓勵在整個營運過程中節約用水。此外，本集團還在工作場所安裝了免接觸式節水水龍頭，並在工作場所周圍張貼節約用水標語。本集團在尋求適用於本集團日常營運的水源上並未出現過問題。

Water conservation practices are encouraged throughout the Group's operations. In addition, the Group has also installed touch-free water saving taps in its workplaces, as well as posted water conservation slogans around the workplace. There was no issue in sourcing water that is fit for the purpose of the Group's daily operation.

本集團已設定目標，將二零二四年用作基準年，到二零三二年削減其水消耗密度10%。請參閱下表，了解本集團實現水消耗密度削減目標的進展詳情。

The Group had set the target to reduce its water consumption intensity by 10% by 2032, using 2024 as the baseline year. See below for the detail breakdown of the Group's progress towards its water consumption intensity reduction target.

	二零二四年數據 2024 E	到二零三二年 的削減目標 2032 T	二零二五年數據 2025 E	變動百分比 % C

為有效應對不斷變化的後疫情市況，本集團已於報告期策略性地預備更多的在產品，這有助於為其產品推出策略預留彈性及方便本集團基於市況隨時作出潛在調整。該等在產品主要包括運輸前需要壓製及包裝的混合茶。於統計流程中，在產品不包含在茶產品總量中，導致水消耗密度較基線為高。

In order to effectively respond to the changing post-epidemic market conditions, the Group has strategically prepared more processed products during the Reporting Period, which helps to reserve flexibility for its product launch strategy and allows the Group to make potential adjustments at any time based on market conditions. These processed products mainly include tea blends that need to be pressed and packaged before shipping. In the accounting process, processed products are not included in the total tea production, leading to higher water consumption intensities when compared to the baseline.

追求環境卓越

PURSUING ENVIRONMENTAL EXCELLENCE

基於該等結果，本集團將密切監控其在水消耗削減方面的進展。由於報告期內生產減少，儘管實質耗水量減少，本集團仍錄得水消耗密度同比增加。儘管如此，本集團將維持其長期水消耗削減目標。然而，倘本集團日後偏離其水消耗削減目標，本集團將考慮透過重新界定基準年或採用不同的密度單位來重新評估其水消耗削減目標。

Based on these results, the Group shall be monitoring its progress on water consumption reduction closely. Due to decreased production during the Reporting Period, the Group has recorded year-on-year increases in water consumption intensity despite the reduction in absolute water consumption. Nevertheless, the Group shall maintain its long-term water consumption reduction targets. However, if the Group strays from its water consumption reduction target in the future, the Group shall consider re-evaluating its water consumption reduction target, either through redefining the baseline year or adopting different units of intensity.

珍惜環境

本集團致力於在管理其產品和服務時充分考慮環境保護。於報告期，本集團依據國家標準及法規規定，降低能源資源消耗，減少採購導致嚴重污染的原材料，從而減輕或消除產品對環境的影響。本集團將與社會及其商業夥伴一起，為創造一個更美好、更環保的世界作出貢獻。

The Group is committed to managing its products and services with great consideration of environmental protection. During the Reporting Period, the Group has acted in accordance with national standards and regulations to reduce its energy and resource consumption, to decrease its procurement of raw materials which lead to significant pollution, and to mitigate or eliminate the environmental impact of its products. Together with society and its business partners, the Group will contribute making a better and greener world.

活動對環境產生的重大影響

作為負責任的企業公民，本集團致力於履行其可持續發展和環境義務。考慮到其業務性質，本集團深知其對環境和自然資源造成的影響，尤其是在原材料消耗方面的影響。

As a responsible corporate citizen, the Group is committed to fulfilling its sustainability and environmental obligations. With consideration to its business nature, the Group is aware of its impacts on the environment and natural resources, particularly in terms of raw material consumption.

本集團的ESG專責小組持續加強本集團在廣泛的環境問題方面的可持續發展表現。不同部門的高級管理層致力於全力支持環保措施，並在日常營運中實施各種環保計劃。

The Group's ESG Task Force Team continues to strengthen the Group's sustainability performance across a wide spectrum of environmental issues. The senior management in different units is dedicated to fully supporting eco-friendly practices and implementing various environmental programme in daily operations.

此外，根據實施中的採購時間表，本集團主要安排於春季採購，讓茶樹能在採摘茶葉後更好地休養生息。再者，本集團採納了多項措施來確保茶樹種植園實踐環境保育，包括派遣員工在採購前視察種植園、給予種植園工人茶樹保育培訓，以及對採購自種植園的原材料進行質檢。最後，本集團已於中國獲得中國質量認證中心的有機認證，證明本集團的農耕作業對生態無害，且符合食品業界的可持續標準。該等措施能鼓勵茶樹種植園投入更多資源去保育茶樹種植園的環境。透過該等措施及關注肥料使用和無害廢物處理政策，本集團可確保種植園對當地環境及生態構成最小的影響。

In addition, according to the procurement schedule being implemented, the Group mainly arranges procurement in spring so that the tea trees can rest better after picking the tea leaves. Furthermore, the Group has adopted a number of measures to ensure that tea plantations practice environmental conservation, including sending employees to inspect plantations before purchasing, providing tea tree conservation training to plantation workers, and conducting quality inspections on raw materials purchased from plantations. Finally, the Group has obtained organic certification from the China Quality Certification Center in China, proving that its farming operations are ecologically sound and meet the sustainability standards of the food industry. Such measures can encourage tea plantations to invest more resources in protecting the environment of tea plantations. Through these measures, attention to fertiliser use, and non-hazardous waste disposal policies, the Group ensures that its plantations have minimal impact on the local environment and ecology.

Looking forward, the Group is committed to creating a more sustainable future for its employees, clients, and the communities it serves.

應對氣候變化

氣候變化是當前全球重大議題和挑戰之一，本集團理解氣候變化的影響與日俱增。隨著全球暖化加劇，本集團的業務將面臨越來越多的風火

Climate change is now one of the major global issues and challenges, and the Group understands that the impact of climate change on the Group will be facing a growing number of risks to its business, including, but not limited to, disruptions to supply chains, damages from natural disasters, shifts in consumer preferences, etc. Climate change will undoubtedly be of increasing concern to the Group as well as the refined tea industry as a whole for the foreseeable future; as such, the Group has endeavoured to identify the risks and opportunities that climate change poses to its business operations, along with corresponding strategies to mitigate risks and to take advantage of arising opportunities. With this in consideration, the Group also agrees with the latest scientific findings of the Intergovernmental Panel on Climate Change (the "IPCC") regarding climate change.

In alignment with TCFD recommendations on climate-related financial disclosure, the Group shall be disclosing its climate-related information based on the four core elements of Governance, Strategy, Risk Management, and Metrics and Targets.

The Group recognises that energy consumption, GHG emissions, and climate change are important aspects of environmental protection which have significant impact on its operations, and thus the Board and senior management have implemented an ESG Task Force Team for formulating countermeasures and strategies for any risks or opportunities that may arise from climate change.

For further details of the Group's ESG governance, please refer to the section "Governance Structure".

追求環境卓越

PURSUING ENVIRONMENTAL EXCELLENCE

考慮到上述風險的時間範圍，本集團將其戰略決策分為三個階段：

- 短期(0至3年)：

該階段涵蓋本集團面臨嚴重且快速出現的氣候風險期間。短期策略的重點在於應對最迫切的威脅，並實施循序漸進的恢復措施。

- 中期(3至10年)：

在此期間，本集團必須組織並鞏固其短期氣候風險管理，在整個業務營運及價值鏈中創造更深遠的影響。

- 長期(10年以上)：

這段期間延伸至氣候變化的長期性及系統性影響，本集團必須加以處理。長遠來看，可以進行結構變革，以減緩並適應深遠的氣候影響。

然而，本集團不僅僅將氣候變化視為一種風險；在氣候相關風險中，本集團亦發現與氣候相關的機遇。例如，本集團計劃進一步以可持續發展的方式採購其茶產品，這或會成為一個廣告宣傳賣點。本集團相信，由於氣候變化的影響日益加劇，公眾的環保意識日益增強，這將開闢新市場客群。此外，由於日益惡化的氣候變化威脅茶樹生長，本集團亦相信其茶葉儲備可創造商機。雖然氣溫和降雨量變化或會降低茶產品的品質和產量，但本集團可將其茶葉儲備定位為保留原有品質的更優質產品，從而使本集團增加來自茶產品的利潤。

本集團將這些視作應對氣候變化帶來的機遇的關鍵步驟。

Taking the time horizon of the above-mentioned risks into consideration, the Group has organised its strategic decision making into three phases:

- Short-term (0 – 3 years):

This phase covers the period during which the Group faces severe and rapidly emerging climate risks. The focus of short-term strategies is to address the most urgent threats and implement gradual recovery measures.

- Medium-term (3 – 10 years):

During this period, the Group must organize and consolidate its short-term climate risk management, creating a deeper impact across its business operations and value chain.

- Long-term (10+ years):

This period extends to the long-term, systemic impacts of climate change that the Group must address. Structural changes can be made in the long run to mitigate and adapt to profound climate effects.

However, the Group does not solely view climate change as a risk; amid the climate-related risks, the Group has also identified climate-related opportunities. For instance, the Group has plans to further source sustainably for its tea products, which may be advertised as a selling point. The Group believes that the general public is becoming more environmentally conscious due to increasing effects of climate change, and this would open a new market base of customers. In addition, as worsening climate change threatens the growing of tea trees, the Group also believes that its tea reserves pose as a business opportunity. While the change in temperatures and rainfall may decrease the quality and output of tea products, the Group may position its tea reserves as a more premium product that retains the original quality, thus allowing the Group to increase profit from its tea products.

The Group views these as key steps towards addressing opportunities arising from climate change.

風險管理

ESG風險評估乃基於評估各項已識別風險(分為三個等級：高、中及低)的可能性及影響進行。風險隨後會經過排序，並根據可能性及影響評級分為高、中及低三個整體風險等級。

An ESG risk assessment was conducted based on assessing the possibility and impact of each identified risk into three levels: high, medium and low. Risks are then prioritised and classified into the overall risk levels, high, medium and low based on the possibility and impact ratings.

低 Low	此等級風險對本集團達成策略目標的危害及後果有限，且發生機率較低。 Risks at this level have limited harm and consequences for the Group to achieve its strategic goals, and the probability of occurrence is low.

本集團已根據TCFD關於氣候相關財務披露的建議所提出的氣候相關風險，確定了其風險狀況。根據風險評估，所有氣候相關風險均被評為中風險或高風險等級。

In terms of physical risks, the Group believes that extreme weather events brought about by climate change poses as both a short-term risk and long-term risk to its business.

In the short-term, extreme weather such as heavy rain, typhoons, or droughts may become increasingly common due to climate change. Said unstable weather conditions not only would cause

追求環境卓越 PURSUING ENVIRONMENTAL EXCELLENCE

The Group has formulated a number of strategies to mitigate damages from these identified physical risks. The Group has established a reactive mechanism for determining the best course of action when facing extreme weather events; for example, the Group may choose to send supplies to local plantation to protect tea leaves and plantation workers if they are needed, or the Group may perform checks on logistics such as transportation or product storage to ensure products are safe from any adverse weather effects. In addition, the Group has also formulated countermeasures to combat the possible decline in quality of tea leaves from long-term climate change. For example, the Group maintains a large quantity of reserve tea leaves in its storage, which would allow the Group to produce refined tea products with its reserves if plantations are unable to produce quality tea leaves. Furthermore, the Group shall also seek out other plantations that are still suited for growing tea trees and engage with them to procure tea leaves for its production, as well as source for sustainable alternatives for its raw materials. Finally, the Group may expand its product offerings to further its potential customer base.

In terms of transition risks, as climate change exacerbates, the Group foresees that market sentiment may shift towards preferring products that have an environmentally friendly image, as increasing awareness of climate change among the general public

追求環境卓越

PURSUING ENVIRONMENTAL EXCELLENCE

The Group has formulated a number of strategies to mitigate damages from these identified transition risks. To lower the reputation risk and the financial risk from changes in market preference, the Group may promote itself as a green company. For example, the Group may share sustainability concepts through media channels to promote the environmental image of its tea products, which may develop the customers' confidence in purchasing its offered tea products and thus maintaining the stability of sales revenue. To lower the risk of interruptions in production due to blackouts, the Group may maintain a backup energy source for its refined tea production facilities.

To measure the level and impact of the Group's climate-related risks, the Group monitors metrics and indicators to ensure an effective and quantitative assessment. The Group monitors and reviews its Scope 1, Scope 2, Scope 3 GHG emissions (in tCO

供應鏈管理

由於近年來茶園工人的工作條件日益受到關注，本集團亦採取了措施，盡量減少供應鏈中使用童工或強迫或強制勞動的可能性。本集團從雲南省等地區的本地茶園採購茶葉，並到訪茶園實地考察，在聘用彼等作為供應商之前，確保其符合本集團的要求且經營場所內不存在童工、強迫或強制勞動的情況。實地考察期間，本集團亦派遣經過專業培訓的工人提供採摘和精製茶葉的技術指導。此舉可確保茶葉的質量符合本集團標準，亦能促使茶園的可持續發展。

As working conditions for tea plantation workers have been a raising concern in recent years, the Group has also implemented measures to minimise the chances of child labour, forced, or compulsory labour within its supply chain. The Group procures its tea leaves from locally owned tea plantations from areas such as the Yunnan Province, and the Group carries out site visits to tea plantations to ensure that they fulfil the Group's requirements and that there are no incidents of child labour, forced, or compulsory labour on the premises before engaging them as suppliers. During these site visits, the Group also sends out professionally trained workers to provide technical guidance on picking and refining tea leaves. This ensures that the quality of tea leaves is of Group standards, and also allows for sustainable development of tea plantations.

本集團從外部公司採購部分包裝材料，均符合國家標準和法規。本集團亦委聘兩家物流公司將茶產品運送至零售商。為推廣環保意識，本集團更傾向於使用可生物降解的包裝材料，並與物流公司簽署協議以過渡至更環保、低碳的運輸方式。

The Group sources some of its packaging material from outside companies, all of which are compliant with national standards and regulations. The Group also engages with two logistics companies to transport its tea products to retailers. To promote environmental consciousness, the Group gives preference to packaging material which are biodegradable, and has signed agreements with logistics companies to transition towards greener, low-carbon transportation.
